DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in is acknowledged. As no argument was presented, the restriction requirement is maintained.

The requirement is still deemed proper and is therefore made FINAL.

Claims 18-73 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in filed 10/10/03. Pending claims are 1-17 & 74-80.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-5, 6, 75, 77 & 78 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-5, 7, 56, 61 & 63 of prior U.S. Patent No. 6,218,118. This is a double patenting rejection.

Art Unit: 1637

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 74, 79 & 80 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 61, 64 & 65 of U.S. Patent No. 6,218,118. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 74 is drawn to kit with mixture of claim 1 and enzyme having nucleotide polymerase activity. Claim 61 of US 6,218,118 is drawn to kit with mixture of claim 1 with DNA ligase which is species of the broad genus of instant claim 74. The species renders the genus obvious.

Claim 79 is drawn to kit with mixture of claim 1, DNA ligase and array. Claim 64 of US 6,218,118 is drawn to mixture of claim 1, DNA ligase, array with cleavable linker which is species of the broad genus of instant claim 79. The species renders the genus obvious.

Claim 80 is drawn to kit with mixture of claim 1, condensing agent and array. Claim 65 of US 6,218,118 is drawn to mixture of claim 1, condensing agent, array with cleavable linker which is species of the broad genus of instant claim 80. The species renders the genus obvious.

SUMMARY

4. Claims 7-14 & 76 are objected to for depending of rejected claim.
